Ubuntu
Mac

ABOUT

I started my career as a Graphic Designer during my time studying at UFRJ. While eager to learn more, at the end of my studies, I decided to embark on a new journey, taking a full turn to coding. I began studying by myself, and as I was falling in love with code, I made the decision to join the Le Wagon coding bootcamp, from where I began my career as a Full-Stack Web Developer. From there, I began working with Ruby as my main coding language, but also dedicated part of my time to Javascript, learning more about React on the way to my Full-stack goals. Since then I've dabbled with Node.js and much more, recently working with Langchain to implement OpenAI in ongoing projects.
Experienced with social & digital media work. I'm a geek, gamer, coffee lover, passionate about music, and a big trending topics follower.
Communicative and diplomatic, I believe that most problems can be solved through open discussions and good management, as communication is a team's key to success.

SKILLS

JavaScript	Ruby on Rails
ReactJS	PostgreSQL
Node.js	REST APIs
Ruby	(& more)

EXPERIENCE

INDIE WEBDEVELOPMENT & FREELANCE WORK

Jan 2020 - Now

- Development of webpages and apps since the beginning of Le Wagon bootcamp. Through the use of Ruby on Rails full-stack, I managed to deploy projects while still learning Rails, as well as post-bootcamp freelancing. I've also done projects in Laravel while working with Suavy's team. Check my work at my official webpage.
- Brief but rich freelance experience working for Quickmail as a fullstack developer in a large project using Angular and Ruby on Rails test-driven development.

JR FULL-STACK DEVELOPER | REACT & RAILS

Cultura Inglesa/Hyper English | Dec 2020 - Aug 2021

- Previous experience as a fullstack developer at Hyper English Squad, maintaining and creating features for a large english learning platform, B2C & B2B, using ReactJS and Ruby on Rails.

ASSOCIATE SOFTWARE ENGINEER | REACT, RAILS & NODE

Jungle Scout | Aug 2021 - Dec 2023

- Previous experience as a full-stack engineer at Jungle Scout, maintaining and creating features for a huge Amazon's Seller Support platform throughout many repositories. I've worked in both Orange and Cobalt Web Apps, as well as the Jungle Scout Browser Extension. Most recent work include taking care of PostgreSQL major updates on AWS RDS and the recently developed Jungle Scout's AI Assist.
